### **COVID-19 STUDENT CAMPUS PROTOCOL**

The following protocol is a set of rules that must be adhered to whilst on campus. It has been designed to align with requirements as stipulated in the Department of Health COVID-19 Disease: Infection Prevention and Control Guidelines.

1. Screening is to be carried out on a daily basis by the parent or student prior to arrival on campus. The form can be accessed from the TMC app under the name Covid-19 Daily Health Check.
2. **Due to the changes in regulation which allow for asymptomatic Covid-19 positive individuals to be on campus the following instructions need to be strictly adhered to:**
  - a. Wash hands frequently. Wash with soap for at least 20 seconds.
  - b. Sanitize hands frequently. Sanitize every time you enter or exit a room or after any contact. Use sanitizer supplied by Thomas More College. Sanitizer is also available in all bathrooms.
  - c. Masks must be worn at all times whilst on campus. Compliant 3-layer masks may be worn.
  - d. Correct coughing etiquette must be followed. Cough into your bent elbow or a tissue. Used tissues must be disposed of immediately in a refuse bin. (A reminder that coughing is a symptom of Covid-19 and thus if coughing regularly the individual should not be considered or screened as asymptomatic).
3. Masks must be washed and ironed daily. Best practice is wear one, wash one.
4. Please immediately report to the school Sister for screening if any Covid-19 symptoms develop during the course of the school day.
5. **A student may not come to campus if they are Covid-19 positive and are experiencing any symptoms of Covid-19. They may return to campus if they have completed the 7-day self-quarantine and are no longer experiencing any symptoms. Refer to the Thomas More College Covid-19 Exposure Policy for further information.**
